Denmark Community Rowing Association Information Sheet

Denmark Rowers formed to build two St Ayles Skiffs for rowing on the under-utilised and environmentally spectacular Denmark River and Wilson Inlet.

St Ayles Skiffs are 6.7m long, four oar and coxswain, coastal rowing boats.

Designed for community volunteers to build from a plywood kit.

They are based on Scottish rowing boats. Over 270 of them have been built since 2010, creating coastal rowing communities around the world, including 15 in Australia.

Rowing is open to all ages, genders and abilities and can be either social or competitive.

The projects strengthen community spirit and provide an enjoyable form of exercise with physical and mental health benefits.

We are fundraising to buy the kits with an initial target of \$30,000.

Please support this project in any way that you can from membership which is only \$30, to naming rights which are \$5,000 per boat.
